

Dear Colleague,

We invite you to participate in a short electronic survey regarding IDC securement care. The survey is aimed at healthcare professionals who are responsible for IDC care in any healthcare setting across Australia for neonates, paediatric and adult populations.

Your decision to participate is voluntary and if you choose not to participate, this will not affect your relationships with the research team, Griffith University, or any other network through which you have received this.

What we are asking you to do

\*The survey is anonymous and has received institutional ethics approvals (Griffith University Reference Number 2024/874).

\*It consists of 29 questions over 4 domains and should only take approximately 10 minutes of your time to complete.

\*There are no foreseeable risks associated with participation in this research.

\*Submitting the survey will imply consent to participate. Once you have submitted the survey, you will not be able to withdraw your consent as no identifying details of your submission will be kept.

\*This survey will be open until 31 May 2025.

\*Survey results will be disseminated via journals articles and/or conference presentations.

\*Electronic results will be stored on a secure Griffith University platform (Research Space) for a period of 5 years from the date of the final publication before being destroyed.

Scan the QR link or click the button below to access the survey.
